

I am very concerned that a company such as Sinclair Broadcasting can decide to require their stations to air a clearly politically slanted documentary without offering equal time to the opponent during the critical pre-election period. The FCC should stop this now before it has even the appearance of affecting the election. I would be just as opposed to Fahrenheit 911 being shown as well as the anti-Kerry documentary.

I would hope the FCC would act now in a politically neutral manner.

Thank you for your attention.
